**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-24 and 26-28, drawn to a method of controlling a drill/driver, classified in class 173, subclass 1.
  - II. Claim 25, drawn to a battery assembly, classified in class 429, subclass 179.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions as defined by the claims of Group I neither recites nor requires the invention as defined by the claims of Groups II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and by their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3721

3. Claims 2-20 and 26-28 are recited as the apparatus claims, and they are dependent claims of claim 1, which is a method claim. These claims could be rejected base on 35 U.S.C. 112, second paragraph (indefiniteness), because it is unclear what is being claimed, a method or an apparatus. Applicant is advised to amend these claims to obviate the indefiniteness issue.
